

NGUYEN NGOC KHAI

CYBERSECURITY | SOC • NETWORK SECURITY • DETECTION ENGINEERING

Ho Chi Minh City, Vietnam | +84 904 568 786 | ngockhai.sec@gmail.com
binnguyen-sec.github.io | linkedin.com/in/ngockhai-sec | github.com/BinNguyen-Sec

PROFILE

Cybersecurity candidate focused on SOC operations, network security, identity, and detection engineering. Hands-on experience building monitored enterprise labs, investigating Windows and network telemetry, and translating findings into detections and response actions.

EDUCATION

Ho Chi Minh City University of Foreign Languages - Information Technology (HUFLIT) 2023 – 2026
Bachelor's Program in Cybersecurity

PROJECT EXPERIENCE

Threat Hunting & Detection Engineering | Wazuh, Sysmon, PowerShell, Sigma, MITRE ATT&CK

- Built a 3-system Kali-Windows-Wazuh lab; instrumented Windows Security, Sysmon, PowerShell 4104, and Wazuh FIM for end-to-end telemetry.
- Simulated an authorized RDP password-guessing → valid access → certutil transfer → PowerShell TCP callback chain; built 5 behavioral hunts and correlated identity, process, file, network, and time evidence across 6 ATT&CK techniques.
- Authored 3 Sigma rules plus RDP failure-to-success correlation logic; documented triage, response, hardening, and validation limitations.

BinCorp Enterprise Infrastructure Lab | AD DS, PKI, pfSense, OpenVPN, Suricata, Splunk

- Designed a segmented enterprise lab across server, client, DMZ, and VPN zones with dual Domain Controllers, AD CS/PKI, role-based file access, pfSense/OpenVPN, Suricata, and centralized logging.
- Validated controls through Windows 4625 failed-logon detection, VPN logging, proxy blocking, Domain Controller failover, and internal PKI/HTTPS; centralized Windows and pfSense telemetry in Splunk.

SOC Homelab - Splunk SIEM | Splunk, Kali Linux, Windows/Linux Logs, DVWA

- Built an Attack → Log Generation → Ingestion → Detection → Alerting → Visualization pipeline in Splunk using Windows and Linux telemetry.
- Simulated network scanning, SSH brute-force, and SQL injection; wrote SPL threshold detection for repeated failed SSH authentication and configured real-time alerts and dashboard views.

TECHNICAL SKILLS

SIEM & Detection: Splunk, Wazuh, Sigma, Sysmon, Windows Event Logs, MITRE ATT&CK, Suricata; threat hunting, incident triage, detection engineering

Network & Identity: Cisco VLAN/STP/OSPF, pfSense, Active Directory, Kerberos, PKI/AD CS, DNS, VPN

Systems & Cloud: Windows Server, Linux, VMware, AWS, Docker, GitHub Actions, OIDC

Scripting: PowerShell, Python, C#/.NET

CERTIFICATIONS

Cisco CCNA – In Progress
